2025 National Ready Mixed Concrete Association Excellence in Safety Awards

The National Ready Mixed Concrete Association (NRMCA) Think First Safety Contest has for many years been a safety performance and incentive/award program aimed to foster safe practices at ready mixed concrete plants across the nation and recognize those plants who have great safety records. The “Excellence in Safety Awards Program” is a 3-tier system, basing the winning facilities from the latest OSHA / Bureau of Labor Statistics (BLS) Incident Rate available for the ready mixed concrete industry. Only those plants with an incident rate below the national average receive awards. The latest BLS data (as of October 2024) shows the ready mixed concrete industry with an incident rate of 4.10. The 3-tiers of “Excellence in Safety Awards” are broken down into Gold, Silver, and Bronze:

- Gold – Incident rate equal to zero
- Silver – Incident rate greater than zero and equal to or less than 2.05 (1/2 the industry average)
- Bronze – Incident rate greater than 2.05 and less than 4.10

Incident rates are calculated from an individual plant’s OSHA 300A Log. The *Incident Rate* is equal to the sum of the *Lost Day Injuries/Illnesses*, *Restricted Duty Day Injuries/Illnesses* and *Other Recordable Cases* multiplied by 200,000 and then divided by the *Number of Employee Hours Worked at the Plant*.

Analyses and Trends

NRMCA's Safety Contest is a per-plant contest open to all concrete batching facilities operated by NRMCA member companies. All company safety performance information is kept confidential. The 2025 program began accepting submissions for the Safety Contest between February and May 2025. NRMCA member companies were urged to submit data for all plants and not to pick just better performing facilities. Please see the following pages in this report for a complete list of the 2025 NRMCA Think First Safety Contest winners. The honored plants are listed by category and in alphabetical order by company name.

NRMCA would like to congratulate the winners of the "Excellence in Safety Award" for 2025 who all had plant incident rates lower than the national average. Finally, to all the plants that entered the contest, it is due to the efforts of all who have voluntarily shared their safety records, that the industry will continue to keep safety an utmost priority and will continue to strive to improve safety records through the benchmarking data and recognition that this contest provides.
